DESIGN

When it comes to handling foods, care is key.

JACOB's FOOD GRADE range sets new benchmarks to optimize your production process. For example, with its multi-port distributor designed specifically for sanitary products, such as powdered milk.

As a result, each of its product contact components complies with FDA regulations as well as EC 1935/2004, reliably transporting your product to its destination. The system features an extremely high degree of flexibility and can be customized to suit your exact needs. A wide variety of measurement and sensor options are also available for integration.
